SHELL LAYER

FEEL FREE TO PUSH.

Sympatex uses molecular technology to pull water molecules out of the fabric and release them as vapour to the outside. this effect increases in harsher conditions, matching your performance.

100%
windproof

optimal

INSULATION LAYER

WARM & LIGHT AS A FEATHER

Primaloft® thermal isolation retains 96% of its insulation even when wet. Ultrafine microfibers keep water out and provide incredible warmth no matter how cold or wet it gets. Primaloft® is also extremely light, so it packs easily without bulk.

The patent pending DuraPro™ ski dampener rubber delivers many unique advantages over other designs:

- The dampener gives a linear, progressive dampening effect which allows the ski to flex more freely at low speeds and loads for softer dampening, and more rigidly at high speeds and loads for stronger dampening. Furthermore, it does this without compromising your ski, bushings, or spindle.
- The dampener maintains a proper ski approach angle position, giving your sled enhanced performance and more predictable handling on the snow. It's a difference that you will notice immediately, especially when traversing technical terrain and crossing other sled trenches / tracks.
- The dampener is the width of the ski cradle, offering maximum square surface area for the spindle. This equates to less wear and tear on your ski bushings, with better twisting and side-to-side stability for the ski.
- The proprietary composition is extremely resilient and resistant to UV light, cracking, tearing, swelling, breaking, abrasion, friction, temperature fluctuations, and vibration. This provides for a very long service life, making this the last ski dampener you'll ever have to buy.

FITMENT:

The DuraPro™ Ski Dampener rubber will fit the following models: 2015 - Present Axys RMK chassis 2011 - 2014 Pro-Ride RMK chassis
The DuraPro™ Ski Dampener for Ski-Doo Gen4 - Ski-Doo REV Gen4 chassis with RAS 3 front suspension

Lifetime Warranty

All DuraPro™ products are designed for ultimate quality, durability, and reliability. That is why we fully warrant them to the original owner against defects in materials and workmanship for life. No time-limits apply. No warranty card is required. All warranty claims need to be handled directly through DURAPRO. MADE IN THE USA with 100% domestic materials and labor!

RACE RUBBER

stop switch component

Race Rubber är produkten för dig som vill undvika hastiga och oförutsedda stopp. Alla har vi som äger en snöskoter kommit åt stoppknappen vid tillfällena då vi inte ville stanna skotern. Den här produkten löser det problemet. Race rubber installeras enkelt på stoppknappen och förhindrar att stoppknappen trycks in oavsiktligt. Du kan naturligtvis fortfarande använda stoppknappen med Race Rubber installerad, men måste då trycka och hålla in knappen för att stanna maskinen.

Vi rekommenderar att du alltid använder nödstopp (tether) på din snöskoter, och att du alltid har på dig den vid användning av maskinen. Stoppknappen bör aldrig vara den enda komponenten för att stanna din maskin vid t.ex. problem med gaswire eller vid olycka.

High Quality Materials
that take the abuse over and over.

Installs In Seconds
stretch it, pull it around and enjoy.

No Tools Required
install it anytime, anywhere.

Lifetime Warranty
you send the bad one we replace it.

Backcountry Tested
by the best free riders around the world.

Economic & Affordable
compared to other resolutions.
